BOARD

E1 STANDARD SOLID WOOD PARTICLE BOARD

- ❑ Is an engineered wood product manufactured from chips, sawmill shavings, or even sawdust, and a synthetic resin or other suitable binder, which is pressed and extruded.
- ❑ It uses oriented strand board techniques, which can make the final product moisture-resistant, stable & strong, anti-bending, and eco-friendly.

E1 STANDARD MDF (MEDIUM DENSITY FIBERBOARD)

- ❑ Is an engineered wood product made by breaking down hardwood or softwood residuals into wood fibers, often in a defibrator, combining it with wax and a resin binder, and forming panels by applying high temperature and pressure.
- ❑ MDF is generally denser than plywood. It is made up of separated fiber, but can be used as a building material similar in application to plywood. It is stronger and much denser than particle board.

SYSTEM CABINET BASE BOARD

Thickness 9mm

Sliding door panel, back panel

Thickness 18mm

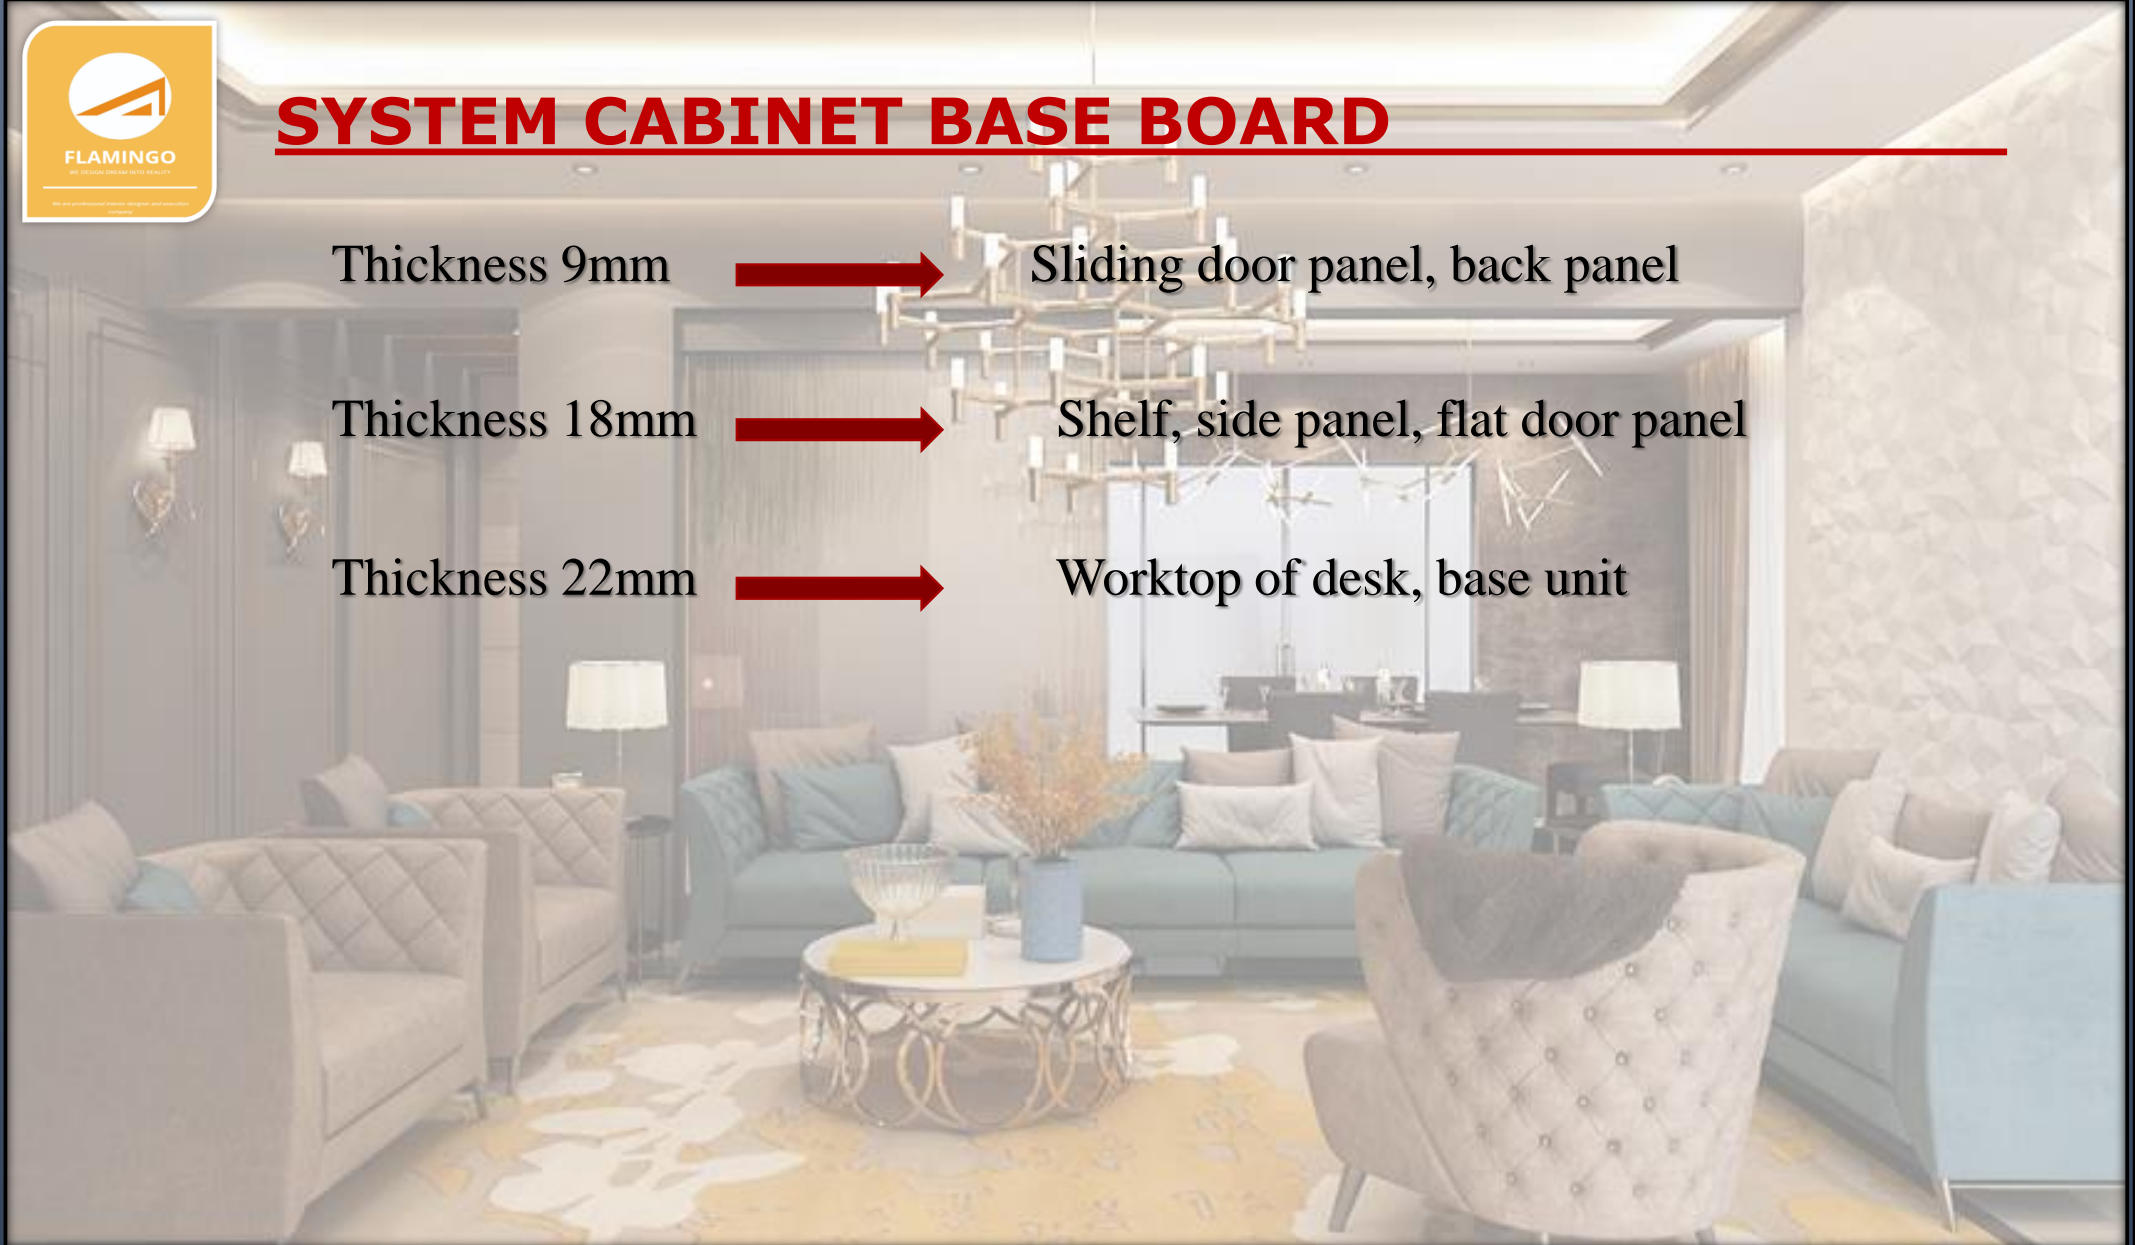

Shelf, side panel, flat door panel

Thickness 22mm

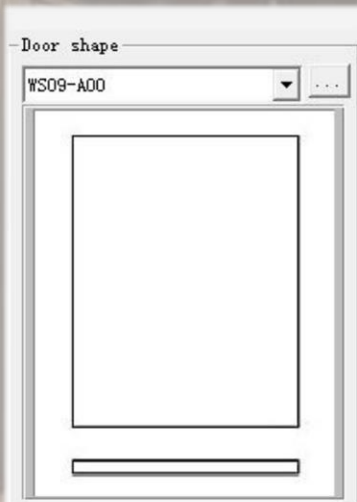

Worktop of desk, base unit

STRUCTURE AND FEATURES

CABINET STRUCTURE

❑ System cabinet is made of 3 components: worktop, unit body and plinth or platform.

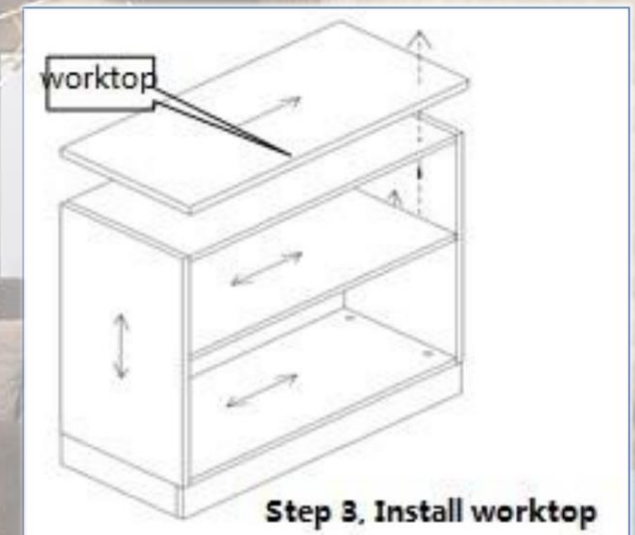

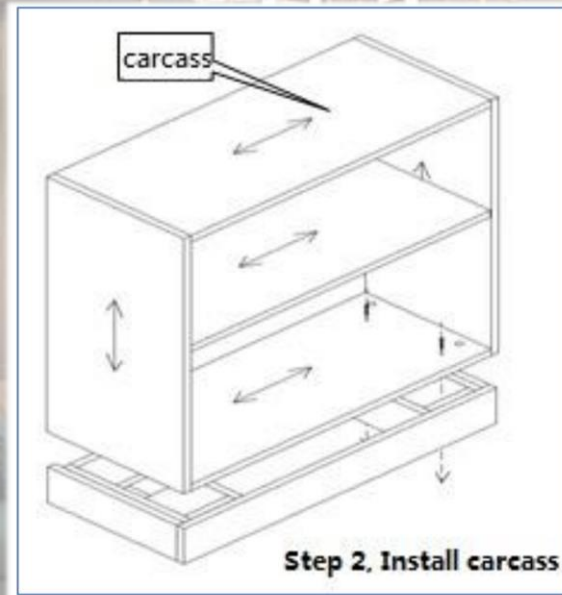

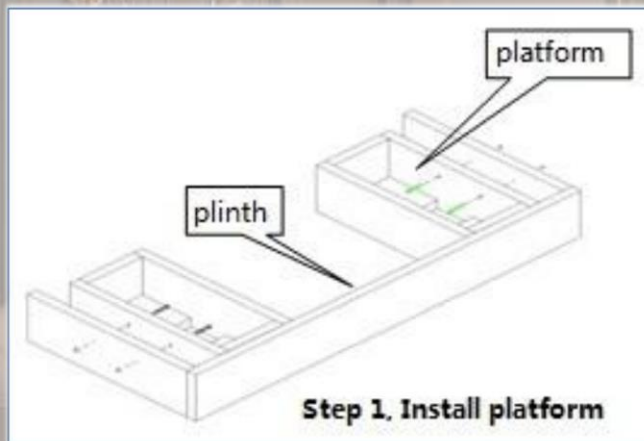

- ❑ The height of single unit is 320mm. Height increment is 320mm.
- ❑ Standard wood platform (100mm)
- ❑ Swing door can be replaced by aluminium framed glass door and new door style.
- ❑ When the net height of cabinet is over 1600mm, no worktop in principle.

INSTALLATION STEPS OF SYSTEM CABINET

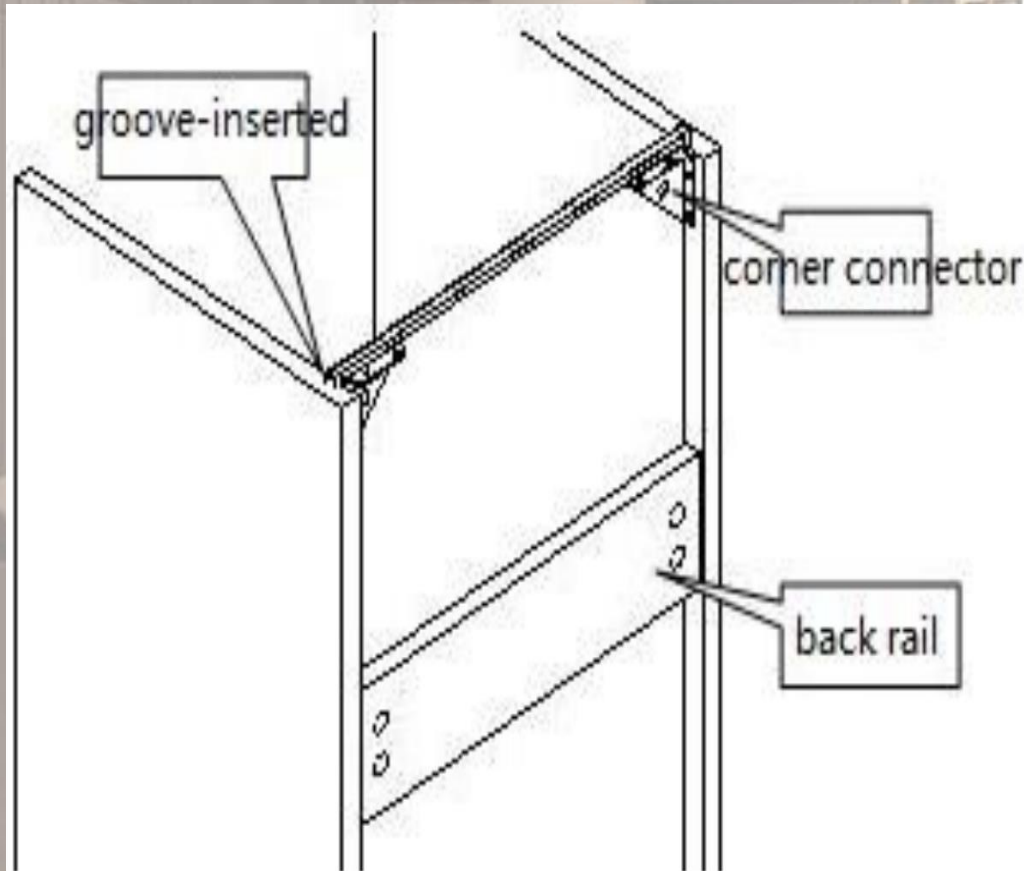

❑ System cabinet is made of 3 components: worktop, unit body and plinth or platform.

INSTALLATION STEPS OF SYSTEM CABINET

❑ Back panel

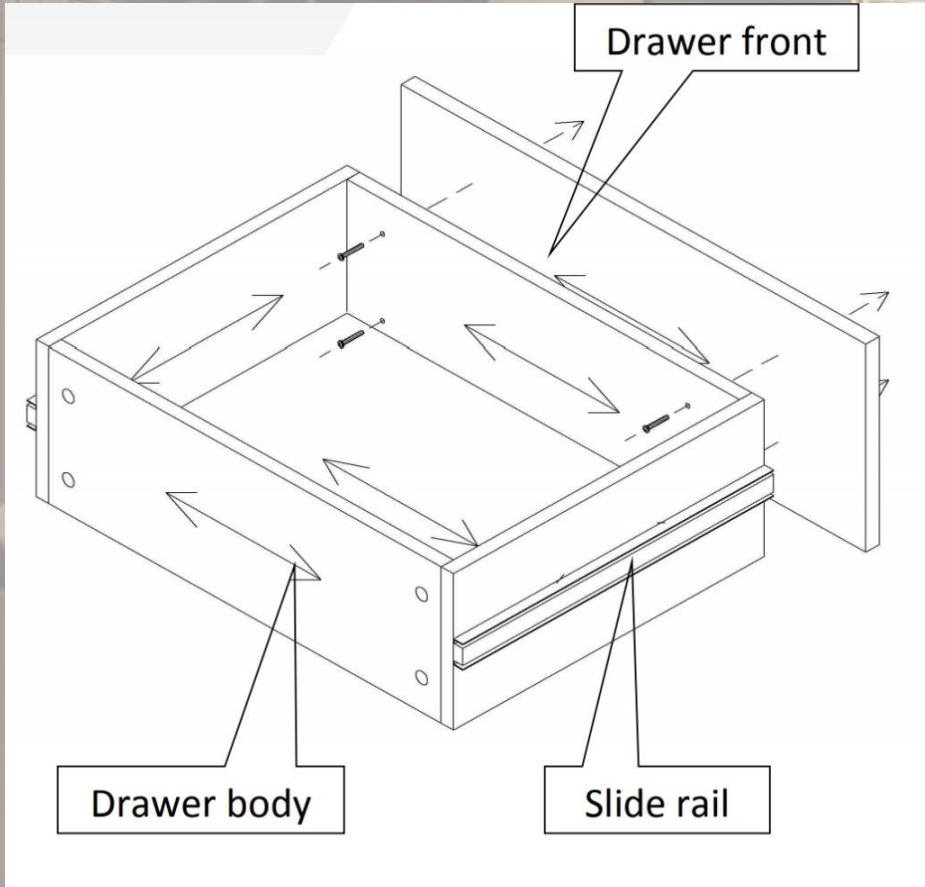

- ❑ All drawer & door panel is full-cover type, no built-in type.**
- ❑ Back panel of system cabinet applies groove-inserted structure, connector in four corners to fix the cabinet. A back rail will be added for tall unit.**
- ❑ Back panel thickness is 9mm, groove is 20mm away from the back. Including the groove, depth is 30mm. (Image attached is a tall unit. No back rail for base unit).**

INSTALLATION STEPS OF SYSTEM CABINET

❑ Drawer

- ❑ There are 3 size of drawer height, 160/240/320mm. As for drawer structure, we use drawer front board to separate drawer body and front board.
- ❑ Thickness of front board, drawer body is 18mm, bottom panel is 9mm.
- ❑ The standard slide rail length is 250/300/350/400/450.

STANDARD SIZE OF SYSTEM CABINET

❑ Width:

1-column unit: 400,500,600

2-column unit: 800,1000,1200

3-column unit: 1200,1500,1800

4-column unit: 1800,2000,2400 (base unit)

❑ Height: 160,240,320,480,640,720,800,960,1280,1600,1920,2080,2240

❑ Depth: 298,350,398,560

FREQUENTLY-USED CABINET DIMENSION

Base unit, TV-unit:

- H 160/240/320 (Worktop & platform not included)
- D 398 (door panel not included)

Wall unit, TV unit/ Bookcase:

- D 220/298 (door panel not included)

Bookcase:

- D 298/350 (door panel not included)
- One column unit width should be less than 500
- H 640/960/1280/1600/1920 (Worktop & platform not included)

Writing desk:

- H 765; D 600

Nightstand:

- H 240/320 (Worktop & platform not included)
- W 400-600
- D 350/398 (door panel not included)

Swing door wardrobe:

- D 560 (door panel not included)
- H 2180 (Worktop & platform not included)
